

CITY OF SPRINGFIELD
INTER-OFFICE MEMORANDUM

ATTENTION OF Joe Allen

DATE August 26, 1976

DEPARTMENT Health Department, Air Pollution

On August 24, 1976 a complaint was received from the resident at 2110 W. Elm (Mrs. William L. Watson). The complaint was in regard to a strong airborne odor from the south which initially was believed to originate from the sewer. Our investigation at approximately 2:00 P.M. revealed no problem with sewer but investigators detected a nauseating odor from the south intermittently. The resident stated the daily odor was particularly strong during the noon hours on this date. Investigation further south revealed no immediate source of odor. The odor detected by investigators was not Syntex Industries but did seem of animal nature.
